CSS Instant Results Richard York,2007-04-10 CSS Instant Results helps you quickly master and implement the diverse web applications CSS enables for web designers. The book is centered around ten ready-to-use projects with all the code for all the projects included on the books CD-ROM - that you can use immediately. CSS Instant Results dives into working code so you can learn it rapidly. The book and code projects are written for web developers and designers who are looking to learn how to use CSS for better, faster design and markup. Some previous JavaScript use is helpful. Each of the 10 project features step-by-step set-up instructions with a description of each project that enables you to understand and then modify it so you can reuse it in different situations. The code has been tested with several browsers including Mozilla Firefox 1.0, Opera 8, Microsoft Internet Explorer 6 for Windows, and Safari 1.3 for Mac OS X. The 10 projects covered in the book with complete source-code on the CD are: Tab-based navigation Multi-column layouts Dynamic dropdown menus A different approach to the dropdown menu Web-based slideshow Custom borders and rounded corners Applying CSS to a webmail application Styling input forms User interface for a web-based file viewer Styling a web-based calendar

Practical Computer Vision with SimpleCV Kurt Demaagd,Anthony Oliver,Nathan Oostendorp,Katherine Scott,2012 Learn how to build your own computer vision (CV) applications quickly and easily with SimpleCV, an open source framework written in Python. Through examples of real-world applications, this hands-on guide introduces you to basic CV techniques for collecting, processing, and analyzing streaming digital images. You'll then learn how to apply these methods with SimpleCV, using sample Python code. All you need to get started is a Windows, Mac, or Linux system, and a willingness to

put CV to work in a variety of ways. Programming experience is optional. Capture images from several sources, including webcams, smartphones, and Kinect Filter image input so your application processes only necessary information Manipulate images by performing basic arithmetic on pixel values Use feature detection techniques to focus on interesting parts of an image Work with several features in a single image, using the NumPy and SciPy Python libraries Learn about optical flow to identify objects that change between two image frames Use SimpleCV's command line and code editor to run examples and test techniques

Carbon Nanotubes for a Green Environment Shrikaant Kulkarni,Iuliana Stoica,A. K. Haghi,2022-06-30 Carbon Nanotubes for a Green Environment: Balancing the Risks and Rewards describes the synthesis, characterization, and unique applications of undoped and doped carbon nanotubes as well as hybrids of them with grapheme or nanocomposites, focusing on green aspects of carbon nanotube applications. The volume shows new approaches used for tapping the potential and promise of key materials in isolation or combined with other materials. The research-oriented chapters highlight a spectrum of applications of carbon nanotubes as novel materials for energy storage as well as for environmental remediation, wastewater treatment, green health care products, and more. Chapters explore the use of carbon nanotubes for remediation methods for wastewater treatment such as by using graphene oxide-carbon nanotube composites and by applying undoped and doped carbon nanotubes for removing contaminates. The book also looks at the application of carbon nanotubes for enhanced oil recovery and for heavy metal separation. Other chapters look at the rheological behavior of carbon nanotubes-based materials and their role in processing for various products, the thermal and electrical transport in carbon nanotubes composites, carbon nanotubes-based composite materials for electromagnetic shielding applications. The biomedical applications of carbon nanotube-based nanomaterials also explored, such as FTIR spectroscopy.

We Stay the Same Jason Roberts,2024-04-23 On a remote island in the South Pacific, the Lavongai have consistently struggled to obtain development through logging and commercial agriculture. Yet many Lavongai still long to move beyond the grind of subsistence work that has seemingly defined their lives on New Hanover, Papua New Guinea, for generations. Following a long history of smaller-scale and largely unsuccessful resource development efforts, New Hanover became the site of three multinational-controlled special agricultural and business leases (SABLs) that combined to cover over 75 percent of the island for ninety-nine-year lease terms. These agroforestry projects were part of a national effort to encourage "sustainable" rural development by tapping into the growing global demand for agricultural lands and crops like oil palm and biofuels. They were supposed to succeed where the smaller-scale projects of the past had failed. Unfortunately, these SABLs resulted in significant forest loss and livelihood degradation, while doing little to promote the type of economic development that many Lavongai had been hoping for. It is within this context that We Stay the Same grounds questions of hope for transformative economic change within Lavongai assessments of the inequitable relationships between global processes of resource development and the local lives that have become increasingly defined by the necessities and failures of these processes. Written in a clear and relatable style for students, We Stay the Same combines ethnographic and ecological research to show how the Lavongai continue to survive and make meaningful lives in a situation where their own hopes for a

better future have often been used against them as a mechanism of a more distantly profitable dispossession.

Java Game Development with LibGDX Lee Stemkoski,2018-01-17 Learn to design and create video games using the Java programming language and the LibGDX software library. Working through the examples in this book, you will create 12 game prototypes in a variety of popular genres, from collection-based and shoot-em-up arcade games to side-scrolling platformers and sword-fighting adventure games. With the flexibility provided by LibGDX, specialized genres such as card games, rhythm games, and visual novels are also covered in this book. Major updates in this edition include chapters covering advanced topics such as alternative sources of user input, procedural content generation, and advanced graphics. Appendices containing examples for game design documentation and a complete JavaDoc style listing of the extension classes developed in the book have also been added. What You Will Learn Create 12 complete video game projects Master advanced Java programming concepts, including data structures, encapsulation, inheritance, and algorithms, in the context of game development Gain practical experience with game design topics, including user interface design, gameplay balancing, and randomized content Integrate third-party components into projects, such as particle effects, tilemaps, and gamepad controllers Who This Book Is For The target audience has a desire to make video games, and an introductory level knowledge of basic Java programming. In particular, the reader need only be familiar with: variables, conditional statements, loops, and be able to write methods to accomplish simple tasks and classes to store related data.

Melanesian Pidgin and Tok Pisin John W. M. Verhaar,1990 The First International Conference on Pidgins and Creoles in Melanesia was planned mainly for Tok Pisin, but no predetermined theme(s) had been proposed to the participants. Nevertheless, in this collection of papers several principal themes stand out.One is that of a revived interest in substratology, both for Tok Pisin and for Bislama. Another is what in fact amounts to a change in perspective from universalism, as supposedly competitive with the substratological orientation, towards a generalist approach to typology, which reduces the apparent polarity, from a theoretical point of view. A third is the pervasive interest of contributors in wider language issues in the social and political life of Papua New Guinea.These interests go back to the linguistic and social experience of the participants, most of whom have a long record of living among the people whose languages they have studied on a day-to-day basis, and to the relative remoteness of their inspiration from the more theoretical and perhaps ultimately untestable issues which surround the universalist approach and its claims for a bioprogram foundation for language.

Stitches in Time David Watters,2010-08-23 This book deals with the history of surgery in Papua New Guinea from the early 1800s until the beginning of the 21st Century. It spans the period from the first European contact to the emergence of highly educated sub-specialist national surgeons. It tells the story from the first impressions of ships surgeons to the introduction and development of surgery. Between 1870 and 1950 the country and the lives of its peoples changed greatly as a result of exploration, evangelisation, colonisation and war. The history traces the surgical challenges encountered as well as the colourful characters who provided the health services run by missions, companies, governments and armies. After

World War II PNG progressed politically from an Australian Administered Territory to become an Independent Nation. Within a generation it had trained its own doctors and surgeons. The history is set within the context of tropical pathologies, introduced diseases, surgical progress and the lives of the medics who have contributed to the Stori bilong kamapim long dokta bilong katim man (The history of surgery).

Spectral Geometry and Inverse Scattering Theory Huaian Diao,Hongyu Liu,2023-10-31 Inverse scattering problems are a vital subject for both theoretical and experimental studies and remain an active field of research in applied mathematics. This book provides a detailed presentation of typical setup of inverse scattering problems for time-harmonic acoustic, electromagnetic and elastic waves. Moreover, it provides systematical and in-depth discussion on an important class of geometrical inverse scattering problems, where the inverse problem aims at recovering the shape and location of a scatterer independent of its medium properties. Readers of this book will be exposed to a unified framework for analyzing a variety of geometrical inverse scattering problems from a spectral geometric perspective. This book contains both overviews of classical results and update-to-date information on latest developments from both a practical and theoretical point of view. It can be used as an advanced graduate textbook in universities or as a reference source for researchers in acquiring the state-of-the-art results in inverse scattering theory and their potential applications.
