Mac OS X Panther Hacks Rael Dornfest,James Duncan Davidson,2004 Mac OS X is a wonderful combination of the power and flexibility of Unix with the ease of use that seems to come only from Apple. Between the tools baked right into the system, a veritable cornucopia of third-party applications, and a cottage industry of customizations, tweaks, and hacks, the Mac is a force to be reckoned with like never before. Mac OS X Panther Hacks celebrates the Macintosh's adventurous spirit, inviting the citizen engineer on a quest of deeper discovery -- both with the purpose of going further and simply enjoying the ride. Mac OS X Panther Hacks continues the tradition started with Mac OS X Hacks, sitting squarely at the peculiar confluence of deadly earnest optimization and creative (albeit sometimes wacky) tweaking you seem to find only on a Mac.

Web Design for Libraries Charles P. Rubenstein, 2014-08-28 Having a clear, attractive, and easy-to-navigate website that allows users to quickly find what they want is essential for any organization—including a library. This workbook makes website creation easy—no HTML required. This book teaches all of the essentials for designing and creating a simple, professional-looking website for any library. By using cut-and-paste templates from familiar software programs, readers can create complex websites in short order—without learning confusing HTML coding. Three final chapters cover using style sheets, address the potential benefits of HTML5, and overview content management system based websites. By using this guidebook as a reference, even those without previous knowledge about web design will possess enough basic information to create a great web page—and, with a little practice, prepare a full library website.

Bispectral Methods of Signal Processing Alexander V. Totsky, Alexander A. Zelensky, Victor F. Kravchenko, 2014-12-11 By studying applications in radar, telecommunications and digital image restoration, this monograph discusses signal processing techniques based on bispectral methods. Improved robustness against different forms of noise as well as preservation of phase information render this method a valuable alternative to common power-spectrum analysis used in radar object recognition, digital wireless communications, and jitter removal in images.

Pomodori a Grappolo, 2014 Pomodori a grappolo is a set of three interconnected books by photographer and bookmaker John Gossage. Each book gathers images made in Northern Italy and Sardinia between 2009 and 2011, and each includes a short text by Marlene Klein. The written pieces--two stories and one epilogue--have been created in response to Gossage's pictures, and reflect the 30 years that Klein has spent living and working in Venice. An unexpected approach runs through all the details of the books, from the way elements repeat, or don't, to the choice of materials and color. Since these three books are each a different trim size but include photos that are reproduced at the exact same size, the collective project functions as a study of the way that ink on paper can inform perception. The resulting objects are classic Gossage--clever, unique and engrossing. A limited edition of the books, held together with magnets in a disorderly way, further explores these concepts.--Amazon.
