Born in the Streets Fondation Cartier, 2009 Beginning in July 2009, the Fondation Cartier will be hosting an exhibition that celebrates street art. The show and the accompanying catalogue first reexamine the birth and evolution of the graffiti movement in New York in the early 1970s, and feature documentation from that time, including press clips and photographs of tags and graffiti by artists such as Lee, Seen, and Lady Pink, among others. The book then explores the explosion of creativity worldwide that followed the New York movement, especially in Paris, which became the nerve center for European graffiti in the 1980s. It juxtaposes the different aesthetics of cities like New York, Paris, London, Berlin, and Sao Paulo, highlighting styles specific to each city and the diverse practices of contemporary artists who began in the graffiti movement. There are interviews with artists who influenced the development of street art and with others, such as gallery owners, who were involved in its evolution.

The publication will feature reproductions of new works by Jones alongside her photo essay and newly commissioned texts by poet and artist Anaïs Duplan; Chisenhale Gallery Senior Curator, Ellen Greig; curator and researcher Aïcha Mehrez; poet, essayist, playwright, and MacArthur Fellow Claudia Rankine; and curator Yates Norton; with a foreword by Chisenhale Gallery Director, Zoé Whitley.

A Bride's Story, Vol. 3 Kaoru Mori, 2018-09-25 (Volume 1) Acclaimed creator Kaoru Mori (Emma, Shirley) brings the nineteenth-century Silk Road to lavish life, chronicling the story of Amir Halgal, a young woman from a nomadic tribe betrothed to a twelve-year-old boy eight years her junior. Coping with cultural differences, blossoming feelings for her new husband, and expectations from both her adoptive and birth families, Amir strives to find her role as she settles into a new life and a new home in a society quick to define that role for her.

Wall Writers Roger Gastman, Caleb Neelon, Chris Pape, 2015 Wall Writers explores graffiti's eruption into mainstream society in the period of social turmoil in the late 1960s and early '70s, and takes a closer look not only at early graffiti's place on the wall but its place in the culture of the time. More comprehensive than any other book on the subject, Wall Writers explores not only early graf writing itself but the writers creating it, the new technology of spray paint that made it possible, and the culture that drove them to write -- be it a need to rebel against the government, to pass a message, or simply be recognized by society. Hundreds of images of everything from spray paint advertisements to commercial greeting cards to images of buildings completely covered in spray painted monikers are included, and reveal the context of the beginnings of a movement that would eventually grow to transform city life, public transit, public art, and ultimately visual art the world over. Includes interviews and profiles of some of the most prolific writers of the time, including TAKI 183, Cornbread, and dozens more.

The Good Drone Austin Choi-Fitzpatrick, 2020-07-28 How small-scale drones, satellites, kites, and balloons are used by social movements for the greater good. Drones are famous for doing bad things: weaponized, they implement remote-control war; used for surveillance, they threaten civil liberties and violate privacy. In *The Good Drone*, Austin Choi-Fitzpatrick examines a different range of uses: the deployment of drones for the greater good. Choi-Fitzpatrick analyzes the way small-scale drones--as well as satellites, kites, and balloons--are used for a great many things, including documenting human rights abuses, estimating demonstration crowd size, supporting anti-poaching advocacy, and advancing climate change research. In fact, he finds, small drones are used disproportionately for good; nonviolent prosocial uses predominate.

A Love Letter for You Stephen Powers, 2010 Murals painted for viewing from the Market-Frankford El along the stretch of track running through West Philadelphia, Pa.

Transported to Another World Stephen Reysen, Courtney N. Plante, Daniel Chadborn, Sharon E. Roberts, Kathleen C. Gerbasi, 2021-04-19 Anime/manga (Japanese animation and comics) have been increasing in popularity worldwide for decades. But despite being a global phenomenon, there's been surprisingly little psychological research formally studying its devoted fanbase. In this book we aim to do just that with an overview of nearly a decade of research by fan psychologists. Otaku and cosplayers, genre preferences, hentai, parasocial connections, motivation, personality, fanship and fandom, stigma, and well-being – this book looks at all of these topics through a psychological lens. Many of these findings are being presented for the first time, without the jargon and messy statistical analyses, but in plain language so it's accessible to all readers – fans and curious observers alike!

Cinnamon Ranjith Senaratne, Ranjith Pathirana, 2021-01-25 Cinnamon is the common name for the spice obtained from the dried inner bark of several species of the genus *Cinnamomum* in the Lauraceae family. In world trade, *Cinnamomum cassia* (L.) J. Presl and *Cinnamomum burmannii* dominate, but it is of a different quality to 'true' or 'Ceylon' cinnamon produced from *Cinnamomum zeylanicum* Blume (C. verum J. Presl), with the latter much easier to process, giving a more delicate, sweeter flavor with nuances of clove, but more importantly with only traces (often below detection thresholds) of coumarin, compared with 5–7 g/kg in other species. Cinnamon has been a popular and expensive spice in many civilizations, including ancient Egypt, Rome and in 14th and 15th century Europe, where it was used primarily to preserve meat for its antibacterial properties, fine aroma and flavor. Ancient Egyptians used cinnamon in mummification process due to its antibacterial properties and fragrance. The quest for cinnamon brought many explorers to Ceylon, whose ancient history is intertwined with the cinnamon trade. Ancient Egyptians and Romans used cinnamon as a valued spice and as an incense. In recent years, much research has been conducted in crop improvement, processing and value addition in cinnamon. In addition to direct

use as a condiment/spice, cinnamon has found a multitude of uses in the food and beverage, traditional medicine, pharmacology, nutraceutical and cosmetics industries. Ceylon cinnamon is unique in that oils distilled from the bark (major constituents are cinnamaldehyde and oleoresins), leaf (eugenol is the major constituent used in dentistry, perfumes, flavorings and as an antioxidant) and roots (camphor) have different industrial uses. Cinnamaldehyde is now a proven natural bactericide widely used in food and beverage industry, effective against *Salmonella* spp. and *Escherichia coli*. Thus, it has become an important natural component of organic fruit and vegetable juices to enhance microbial safety of these nutritious beverages. Because of its manifold uses, cinnamon is an important crop. There have been many recent publications on its ethnobotany, genetics, crop improvement, agronomy, processing, biotechnology, chemistry, food and medicinal uses, and industrial applications. However, one book condensing all these findings is lacking. Our publication, with chapters devoted to all these aspects of cinnamon written by experts in these fields, condenses current knowledge into a single source and contribute to the advancement and dissemination of knowledge and technology. Contributors to the book constitute internationally renowned senior scientists and academics with hands-on experience as well as movers and shakers of industry, thereby striking a right balance between theory and practice. Therefore it is a valuable source for students, teachers, scientists, planners policy makers, practicing agriculturists and industrialists, and a prized acquisition to any library in higher education institutions, R & D institutions and public and private sector institutions in agriculture and allied fields.

The F.A.T. Manual Geraldine Juárez,2013 In more than five years of activity, the Free Art and Technology Lab produced an impressive series of projects, all developed with open source software, shared online and documented in a way that allows everybody to copy, improve, abuse or simply use them. This approach situates F.A.T. Lab in a long tradition of DIY, processual, sharable artistic practices based on instructionals, and reveals a democratic idea of art where Fluxus scores meet hacker culture (and rap music). The F.A.T. Manual is a selection of more that 100 projects, done in the belief that printing these bits on paper will allow them to spread in a different way, infiltrate other contexts, and germinate. An archive, a catalogue, a user manual and a software handbook. F.A.T. Lab is an organization dedicated to enriching the public domain through the research and development of creative technologies and media. Co-produced by Link Editions and MU in collaboration with XPO Gallery, Paris.

Date Farmers Armando Lerma,2007 The Date Farmers, Carlos Ramirez and Armando Lerma of Coachella Valley often collaborate in their art, collage, drawings, and words on discarded signs. Their art depicts Mexican American religious icons and their style resembles prison art - their lettering strong in a low rider tradition of bold sign painting.
