World Bank East Asia and Pacific Economic Update April 2016 World Bank, 2016-04-11 In the past 6 months, developing East Asia and Pacific has faced a challenging external environment, but growth has generally remained resilient. Over the next 3 years, growth is expected to ease modestly. China will continue its gradual shift to a more sustainable growth path. Some economies will be affected by low commodity prices and weaker external demand. This outlook is subject to elevated risks. Countries should prioritize monetary and fiscal policies that reduce their exposure to risks and strengthen market confidence. In China, there is a need to reduce leverage. In several countries, action is required to enhance transparency, strengthen accountability, and redefine the role of the state. Efforts to reduce barriers to trade should be redoubled, with a particular focus on non-tariff measures and regulatory barriers, including to trade in services. The region must increase its readiness to benefit from the digital revolution, and in particular develop the essential “analog complements” to digital technologies.

School Choice Mercedes K. Schneider, 2016-06-01 Proponents of market-driven education reform view vouchers and charters as superior to local-board-run, community-based public schools. However, the author of this timely volume argues that there is no clear research supporting this view. In fact, she claims there is increasing evidence of charter mismanagement—with public funding all-too-often being squandered while public schools are being closed or consolidated. Tracing the origins of vouchers and charters in the United States, this book examines the push to “globally compete” with education systems in countries such as China and Finland. It documents issues important to the school choice debate,

including the impoverishment of public schools to support privatized schools, the abandonment of long-held principles of public education, questionable disciplinary practices, and community disruption. *School Choice: The End of Public Education?* is essential reading for anyone seeking a deeper understanding of the past and future of public education in America. Book Features: Provides a comprehensive historical account of the origins of vouchers and charters. Includes accounts of intriguing historical experiences. Examines the defunding of neighborhood public schools in favor of often underregulated charters. Reveals charter school “churn” that often follows the closing of a mismanaged charter. Provides a cogent counternarrative to the claim that charters are necessary for America to compete globally. “How fortunate that we have another soon-to-be classic from Mercedes Schneider that informs and empowers us all for the fight back!” —Joyce E. King, Georgia State University “Schneider provides a must-read for anyone, especially educators, interested in the future of public education.” —Margaret-Mary Sulentic Dowell, Louisiana State University “Outstanding! Powerful! This is the most interesting and best-researched book on school choice I've ever read.” —Julian Vasquez Heilig, California State University

Global Economic Prospects, Volume 7, June 2013 The World Bank, 2013-06-12 The global economy appears to be transitioning toward a more stable period. Although acute risks have diminished, real-side activity remains sluggish - especially in high-income Europe. Most developing countries have fully recovered from the crisis. Although growth is slower than during the boom period, it is in line with underlying potential, and output is projected to pick up only gradually to around 5.8 percent by 2015. High unemployment and spare capacity remain pressing problems in developing Europe and the

Middle East and North Africa. With a more stable external environment, new risks and challenges are gaining prominence, including the potential impact on exporting countries of a faster than anticipated decline in commodity prices, the possibility that the eventual withdrawal of quantitative easing exposes vulnerabilities in developing countries, and the need to resort increasingly to supply-side rather than demand stimulus policies to achieve stronger growth.

Industrial Motion Control Dr. Hakan Gurocak, 2016-03-14 Motion control is widely used in all types of industries including packaging, assembly, textile, paper, printing, food processing, wood products, machinery, electronics and semiconductor manufacturing. Industrial motion control applications use specialized equipment and require system design and integration. To design such systems, engineers need to be familiar with industrial motion control products; be able to bring together control theory, kinematics, dynamics, electronics, simulation, programming and machine design; apply interdisciplinary knowledge; and deal with practical application issues. The book is intended to be an introduction to the topic for senior level undergraduate mechanical and electrical engineering students. It should also be resource for system design engineers, mechanical engineers, electrical engineers, project managers, industrial engineers, manufacturing engineers, product managers, field engineers, and programmers in industry.

Health Care Financing and Affordability in the Emerging Global Markets Mihajlo (Michael) Jakovljevic, Kyriakos Souliotis, Wim Groot, 2016-04-14 During the recent few decades, global economic growth has been driven largely by developing world economies. The ones with the most intensive pace of development were marked as “emerging” markets led by so called BRICS and N-11 countries. Such changes inevitably reflected the global health arena. A number of issues previously limited to established high-income economies became popularly discussed topics on the agendas of public health policy makers across these regions. Major challenges remain population aging, rising incidence of prosperity diseases, lack of universal insurance coverage and particularly provision of just and equitable access to medical care among the poor both in urban and rural communities. A significant part of the difficulties faced by these societies are attributed to inefficient resource allocation strategies in health care and unsatisfactory funding strategies. This Research Topic was created in order to address the core challenges of medical care financing and its affordability across the emerging global markets. Contributions of both undergoing or finished original research as well as review style papers are welcomed. All submitted manuscripts should deal with issues relevant to health care economics and policy in recognized global emerging markets. Outside the aforementioned key markets (BRICS- Brazil, Russia, India, China, South Africa; Next 11- Bangladesh, Egypt, Indonesia, Iran, South Korea, Mexico, Nigeria, Pakistan, the Philippines, Turkey and Vietnam) submissions referring to any of the dynamically developing Asian, Latin America, Eastern Europe or MENA countries are encouraged. In addition to a variety of health-economic evaluations and health policy analysis, methodological and resource use studies are within the Topic scope. Health policy considerations should be primarily focused on financing mechanisms and affordability of health care

although other surrounding issues such as health insurance, reimbursement and cost-containment strategies will be considered.

Corporate Power and Human Rights Manette Kaisershot, Nicholas Connolly, 2018-02-02 There is ample evidence about the negative effects business activity of all types can have on the provision of human rights. Equally, there can be little doubt

economic development, usually driven through business activity and trade, is necessary for any state to provide the institutions and infrastructure necessary to secure and provide human rights for their citizens. The United Nations and businesses recognise this tension and are collaborating to effect change in business behaviours through voluntary initiatives such as the Global Compact and John Ruggie's Guiding Principles. Yet voluntary approaches are evidently failing to prevent human rights violations and there are few alternatives in law for affected communities to seek justice. This book seeks to robustly challenge the current status quo of business approaches to human rights in order to develop meaningful alternatives in an attempt to breach the gap between the realities of business and human rights and its discourse. This book was previously published as a special issue of the International Journal of Human Rights.

The Report: Papua New Guinea 2014 Oxford Business Group, 2014-09-04 Papua New Guinea is poised for change, as the country's mineral riches are providing a major opportunity for economic development through the exploitation of natural resources. The government's five-year strategic plan focuses on key development enablers such as free education, improvements to health services, the strengthening of law and order, rural development projects and infrastructure construction. Inward investment has increasingly been driven by the extractive sector, including oil and gas, whose share of the country's total investment stock rose from 71% to 87% between 2004 and 2012. Statistics from the Investment Promotion Authority reveal that the largest share of new foreign direct investment in 2013, some 24.6%, targeted the construction sector, outpacing that in financial services, manufacturing and mining, which accounted for 19.8%, 18.1% and 10.9%, respectively. While minerals and hydrocarbons dominate exports, around 85% of the country's population is employed in the agriculture sector. The start of liquefied natural gas exports in 2014 is expected to return the current account to a surplus in 2015, forecast as high as 12.1% of GDP before returning to 9.1% the following year. While the outlook for state revenues remains strong in the medium term, ensuring the sustainability of further spending increases will be key to preserving macroeconomic stability.
