Poverty in the Philippines Asian Development Bank,2009-12-01 Against the backdrop of the global financial crisis and rising food, fuel, and commodity prices, addressing poverty and inequality in the Philippines remains a challenge. The proportion of households living below the official poverty line has declined slowly and unevenly in the past four decades, and poverty reduction has been much slower than in neighboring countries such as the People's Republic of China, Indonesia, Thailand, and Viet Nam. Economic growth has gone through boom and bust cycles, and recent episodes of moderate economic expansion have had limited impact on the poor. Great inequality across income brackets, regions, and sectors, as well as unmanaged population growth, are considered some of the key factors constraining poverty reduction efforts. This publication analyzes the causes of poverty and recommends ways to accelerate poverty reduction and achieve more inclusive growth. It also provides an overview of current government responses, strategies, and achievements in the fight against poverty and identifies and prioritizes future needs and interventions. The analysis is based on current literature and the latest available data, including the 2006 Family Income and Expenditure Survey.

Global Tuberculosis Report 2016 World Health Organization,2016 This global tuberculosis report is the first to be produced in the era of the SDGs and the End TB Strategy. It provides an assessment of the TB epidemic and progress in TB diagnosis, treatment, and prevention efforts as well as an overview of TB-specific financing and research. It also discusses the broader agenda of universal health coverage, social protection, and other SDGs that have an impact on health. Data was available for 202 countries and territories that account for over 99% of the world's population and TB cases.

What's In, What's Out Amanda Glassman,Ursula Giedion,Peter C. Smith,2017-10-10 Vaccinate children against deadly pneumococcal disease, or pay for cardiac patients to undergo lifesaving surgery? Cover the costs of dialysis for kidney patients, or channel the money toward preventing the conditions that lead to renal failure in the first place? Policymakers dealing with the realities of limited health care budgets face tough decisions like these regularly. And for many individuals, their personal health care choices are equally stark: paying for medical treatment could push them into poverty. Many low- and middle-income countries now aspire to universal health coverage, where governments ensure that all people have access to the quality health services they need without risk of impoverishment. But for universal health coverage to become reality, the health services offered must be consistent with the funds available—and this implies tough everyday choices for

policymakers that could be the difference between life and death for those affected by any given condition or disease. The situation is particularly acute in low- and middle income countries where public spending on health is on the rise but still extremely low, and where demand for expanded services is growing rapidly. *What's In, What's Out: Designing Benefits for Universal Health Coverage* argues that the creation of an explicit health benefits plan—a defined list of services that are and are not available—is an essential element in creating a sustainable system of universal health coverage. With contributions from leading health economists and policy experts, the book considers the many dimensions of governance, institutions, methods, political economy, and ethics that are needed to decide what's in and what's out in a way that is fair, evidence-based, and sustainable over time.

Protecting The Poor: A Microinsurance Compendium Craig Churchill,2008

Migrating to Opportunity Mauro Testaverde,Harry Moroz,Claire H. Hollweg,Achim Schmillen,2017-10-02 The movement of people in Southeast Asia is an issue of increasing importance. Countries of the Association of Southeast Asian Nations (ASEAN) are now the origin of 8 percent of the world's migrants. These countries host only 4 percent of the world's migrants but intra-regional migration has turned Malaysia, Singapore, and Thailand into regional migration hubs that are home to 6.5 million ASEAN migrants. However, significant international and domestic labor mobility costs limit the ability of workers to change firms, sectors, and geographies in ASEAN. This report takes an innovative approach to estimate the costs for workers to migrate internationally. Singapore and Malaysia have the lowest international labor mobility costs in ASEAN while workers migrating to Myanmar and Vietnam have the highest costs. Singapore and Malaysia's more developed migration systems are a key reason for their lower labor mobility costs. How easily workers can move to take advantage of new opportunities is important in determining how they fare under the increased economic integration planned for ASEAN. To study this question, the report simulates how worker welfare is affected by enhanced trade integration under different scenarios of labor mobility costs. Region-wide, worker welfare would be 14 percent higher if barriers to mobility were reduced for skilled workers, and an additional 29 percent if barriers to mobility were lowered for all workers. Weaknesses in migration systems increase international labor mobility costs, but policy reforms can help. Destination countries should work toward systems that are responsive to economic needs and consistent with domestic policies. Sending countries should balance protections for migrant workers with the needs of economic development.

Social Impact of the Global Financial Crisis in the Philippines Arsenio M. Balisacan,2010-12-01 Anecdotal evidence permeates accounts on the impact of the global economic crisis on Philippine poverty. This study systematically assesses the evidence and recent data. It adopts a somewhat eclectic approach as applying regression and decomposition techniques to trace the impact of the global economic crisis on gross domestic product and its major components, constructing panel data

from nationally representative household surveys to trace the changes in household welfare during the crisis, and combining national income accounts and household survey data to simulate the differential effects of the crisis across population groups and social divides. Empirical findings suggest that although the Philippine economy did not slide to recession during the crisis, its impact on the economy and poverty across population groups was nonetheless severe---and may linger for many years to come.

Global Tuberculosis Report 2019 World Health Organization,2019-08-12 WHO has published a global TB report every year since 1997. The main aim of the report is to provide a comprehensive and up-to-date assessment of the TB epidemic, and of progress in prevention, diagnosis and treatment of the disease, at global, regional and country levels. This is done in the context of recommended global TB strategies and targets endorsed by WHO's Member States, broader development goals set by the United Nations (UN) and targets set in the political declaration at the first UN high-level meeting on TB (held in September 2018). The 2019 edition of the global TB report was released on 17 October 2019. The data in this report are updated annually. Please note that direct comparisons between estimates of TB disease burden in the latest report and previous reports are not appropriate. The most recent time-series of estimates are published in the 2019 global TB report.

Social Protection for Informal Workers in Asia Sri Wening Handayani,2016-12-01 This publication examines the need to expand social protection coverage of the informal sector to support working age productivity, reduce vulnerability, and improve economic opportunity. Case studies from Bangladesh, the People's Republic of China, India, Indonesia, Pakistan, the Philippines, and Thailand offer suggestions to close social protection gaps and recommend policy solutions to create equitable and inclusive social protection programs for informal workers.
