Maria Harris, Imani Speaks

Coming of Age in Second Life Tom Boellstorff, 2015-08-25 Millions of people around the world today spend portions of their lives in online virtual worlds. Second Life is one of the largest of these virtual worlds. The residents of Second Life create communities, buy property and build homes, go to concerts, meet in bars, attend weddings and religious services, buy and sell virtual goods and services, find friendship, fall in love--the possibilities are endless, and all encountered through a computer screen. At the time of its initial publication in 2008, *Coming of Age in Second Life* was the first book of anthropology to examine this thriving alternate universe. Tom Boellstorff conducted more than two years of fieldwork in Second Life, living among and observing its residents in exactly the same way anthropologists traditionally have done to learn about cultures and social groups in the so-called real world. He conducted his research as the avatar Tom Bukowski, and applied the rigorous methods of anthropology to study many facets of this new frontier of human life, including issues of gender, race, sex, money, conflict and antisocial behavior, the construction of place and time, and the interplay of self and group. *Coming of Age in Second Life* shows how virtual worlds can change ideas about identity and society. Bringing anthropology into territory never before studied, this book demonstrates that in some ways humans have always been virtual, and that virtual worlds in all their rich complexity build upon a human capacity for culture that is as old as humanity itself. Now with a new preface in which the author places his book in light of the most recent transformations in online culture, *Coming of Age in Second Life* remains the classic ethnography of virtual worlds.

Virtual Reality and Virtual Environments in 10 Lectures Stanislav Stanković, 2022-06-01 The book is based on the material originally developed for the course on Virtual Reality, which the author was teaching at Tampere University of Technology, as well as course on Virtual Environments that the author had prepared for the University for Advancing Studies at Tempe, Arizona. This original purpose has influenced the structure of this book as well as the depth to which we explore the presented concepts. Therefore, our intention in this book is to give an introduction into the important issues regarding a series of related concepts of Virtual Reality, Augmented Reality, and Virtual Environments. We do not attempt to go into any of these issues in depth but rather outline general principles and discuss them in a sense broad enough to provide sufficient

foundations for a further study. In other words, we aim to provide a set of keywords to the reader in order give him a good starting point from which he could go on and explore any of these issues in detail. Shortlisted Hannah Brenner Johnson, Renee Knake Jefferson, 2022-02-15 Winner, Next Generation Indie Book Awards - Women's Nonfiction Best Book of 2020, National Law Journal The inspiring and previously untold history of the women considered—but not selected—for the US Supreme Court In 1981, Sandra Day O'Connor became the first female justice on the United States Supreme Court after centuries of male appointments, a watershed moment in the long struggle for gender equality. Yet few know about the remarkable women considered in the decades before her triumph. *Shortlisted* tells the overlooked stories of nine extraordinary women—a cohort large enough to seat the entire Supreme Court—who appeared on presidential lists dating back to the 1930s. Florence Allen, the first female judge on the highest court in Ohio, was named repeatedly in those early years. Eight more followed, including Amalya Kearse, a federal appellate judge who was the first African American woman viewed as a potential Supreme Court nominee. Award-winning scholars Renee Knake Jefferson and Hannah Brenner Johnson cleverly weave together long-forgotten materials from presidential libraries and private archives to reveal the professional and personal lives of these accomplished women. In addition to filling a notable historical gap, the book exposes the tragedy of the shortlist. Listing and bypassing qualified female candidates creates a false appearance of diversity that preserves the status quo, a fate all too familiar for women, especially minorities. *Shortlisted* offers a roadmap to combat enduring bias and discrimination. It is a must-read for those seeking positions of power as well as for the powerful who select them in the legal profession and beyond.

My Cat Likes to Hide in Boxes Eve Sutton, 2015-08-06 Lots of cats all around the world do exciting things like fly aeroplanes or play the violin - but my cat, an ordinary round-the-house cat, likes to hide in boxes. Children will love joining in with this fun rhyming story that is just right for beginner readers.

America's Unholy Ghosts Joel Edward Goza, 2019-03-22 America's Unholy Ghosts examines the DNA of the ideologies that shape our nation, ideologies that are as American as apple pie but that too often justify and perpetuate racist ideas and racial inequalities. MLK challenged us to investigate the "ideational roots of race hate" and *Ghosts* does just that by examining a philosophical "trinity"—Thomas Hobbes, John Locke, and Adam Smith—whose works collectively helped to institutionalize, imagine, and ingrain racist ideologies into the hearts and minds of the American people. As time passed, America's racial imagination evolved to form people incapable of recognizing their addiction to racist ideas. Thus, *Ghosts* comes to a close

with the brilliant faith and politics of Martin Luther King, Jr. who sought to write the conscience of the Prophetic Black Church onto American hearts, minds, and laws. If our nation's racist instincts still haunt our land, so too do our hopes and desires for a faith and politics marked by mercy, justice, and equity—and there is no better guide to that land than the Prophetic Black Church and the one who saw such a land from the mountaintop. .embed-container { position: relative; padding-bottom: 56.25%; height: 0; overflow: hidden; max-width: 100%; } .embed-container iframe, .embed-container object, .embed-container embed { position: absolute; top: 0; left: 0; width: 100%; height: 100%; }

Princess Pinecone and the Wee Royals C. C. Bernstein, 2020-11-08 Princess Pinecone and the Wee Royals is a photographed facsimile of an entirely hand-stitched children's book. The original took Irem Yazici more than 1,400 hours to stitch and three years to create. The tale is inspired by a story C.C.'s mom used to tell her before bed and it will teach your little one empathy, forgiveness and kindness.

Street to Studio Rafael Schacter, 2018 For fifty years, graffiti and street art have been challenging conventions and stimulating debate around our perceptions of what constitutes art. As the genre enters its sixth decade, this ground-breaking book presents a new interpretation of where these alternative artforms are situated today. Introducing the concept of 'Inter mural Art' - art in-between the walls - Rafael Schacter presents a genre at a key moment of transition. While many street and graffiti artists are still challenging the orthodoxies of the public sphere, an increasingly prevalent group are reshaping the field by their studio practice. No longer furtively entering the institution, no longer slavishly reproducing exterior works inside, these artists have begun to create a form that articulates graffiti, street and contemporary-art influences, a form beholden on high art techniques and practices whilst simultaneously embracing its non-institutional roots. Through forty profiles of the leading proponents of this new approach from around the globe, Rafael Schacter presents a compelling analysis for 'Inter mural Art' while also showcasing some of the boldest work being made within contemporary art today.--Page 4 de la couverture.

A Quantum City Ludger Hovestadt, Vera Bühlmann, 2015-06-16 We know the specific strengths of various cities, are aware of their ranking, are able to discuss their density and growth. But what do all cities have in common, what do we know about the “lowest common denominator”? The “city as a species”, the “primal genetic material of the city”: this is the subject of *A Quantum City*. This colossal work is a love letter to the city and intellectual culture. We follow the fictional narrative figure, Orlando, beginning in 320 BC, on his odyssey through the Western world up to the present time. The book is divided into four interrelated chapters and can be read page by page in a discursive manner, however randomly browsing through the book also offers new and multi-faceted interpretations. Great intellectual achievements are compared with obscure and mundane events. *A Quantum City* offers an inspiring view of the city that is in us and around us.
