**Anti-Corruption and its Discontents** Grant W. Walton, 2017-08-03 The fight against corruption is now a core part of development policy and practice. Some call these efforts a 'war on corruption'. What does this so-called 'war' mean for developing countries? And how do international perspectives on corruption relate to local and national concerns? This book examines the relevance of anti-corruption discourse in Papua New Guinea (PNG), one of the most culturally rich and 'corrupt' countries on earth. Despite increased international, national and local efforts to address corruption over the past two decades, many fear that levels of corruption continue to rise largely unabated. Some believe that the mismatch between international, national and local assumptions regarding the nature of corruption and how it should be addressed is at the heart of the issue. International anti-corruption initiatives stress 'zero-tolerance' and try to strengthen formal state-based institutions. However, many people in PNG are more concerned about maintaining social relationships than following state laws and rules. This book critically examines the implications of the anti-corruption agenda and the collision of international, national and local perspectives. In doing so it provides a diagnostic on international assumptions about corruption and how it should be fought in developing countries, offering surprising and important lessons. This book is essential reading for scholars and students of Development Studies, Geography, Political Studies and Economics, as well as practitioners and policy makers working in development.

**Republic of Fiji** International Monetary Fund, 2012-02-21 This 2011 Article IV Consultation reports that Fiji's economic outlook appears stable, but there are downside risks related to the political situation, structural weaknesses, and the global environment. The 2012 budget has proposed much-needed fiscal consolidation, though marginal income tax rate reductions will make it difficult to achieve deficit targets. Monetary policy is accommodative, given the currently benign inflation outlook, but continued vigilance against future inflationary pressure is critical, and credit growth targets should be avoided.

The Oil Palm R. H. V. Corley, P. B. H. Tinker, 2015-10-06 The oil palm is the world's most valuable oil crop. Its production has increased over the decades, reaching 56 million tons in 2013, and it gives the highest yields per hectare of all oil crops. Remarkably, oil palm has remained profitable through periods of low prices. Demand for palm oil is also expanding, with the

edible demand now complemented by added demand from biodiesel producers. The Oil Palm is the definitive reference work on this important crop. This fifth edition features new topics - including the conversion of palm oil to biodiesel, and discussions about the impacts of palm oil production on the environment and effects of climate change - alongside comprehensively revised chapters, with updated references throughout. The Oil Palm, Fifth Edition will be useful to researchers, plantation and mill managers who wish to understand the science underlying recommended practices. It is an indispensable reference for agriculture students and all those working in the oil palm industry worldwide.

Papua New Guinea International Monetary Fund. Asia and Pacific Dept,2014-12-02 This Selected Issues paper analyzes the sustainability of Papua New Guinea's current and medium-term fiscal policy and its consistency with government objectives. The Papua New Guinea government faces major challenges in shaping a fiscal policy that promotes stability, meets development needs, and adheres to its debt ceilings over the medium term. It could decide to continue with its current fiscal stance, which would see its resource wealth exhausted quickly through large development spending. This approach would likely require continued borrowing and leave little savings for future generations.

Health Care Financing and Affordability in the Emerging Global Markets Mihajlo (Michael) Jakovljevic,Kyriakos

Souliotis,Wim Groot,2016-04-14 During the recent few decades, global economic growth has been driven largely by developing world economies. The ones with the most intensive pace of development were marked as “emerging” markets led by so called BRICS and N-11 countries. Such changes inevitably reflected the global health arena. A number of issues previously limited to established high-income economies became popularly discussed topics on the agendas of public health policy makers across these regions. Major challenges remain population aging, rising incidence of prosperity diseases, lack of universal insurance coverage and particularly provision of just and equitable access to medical care among the poor both in urban and rural communities. A significant part of the difficulties faced by these societies are attributed to inefficient resource allocation strategies in health care and unsatisfactory funding strategies. This Research Topic was created in order to address the core challenges of medical care financing and its affordability across the emerging global markets. Contributions of both undergoing or finished original research as well as review style papers are welcomed. All submitted manuscripts should deal with issues relevant to health care economics and policy in recognized global emerging markets. Outside the aforementioned key markets (BRICS- Brazil, Russia, India, China, South Africa; Next 11- Bangladesh, Egypt, Indonesia, Iran, South Korea, Mexico, Nigeria, Pakistan, the Philippines, Turkey and Vietnam) submissions referring to any of the dynamically developing Asian, Latin America, Eastern Europe or MENA countries are encouraged. In addition to a variety of health-economic evaluations and health policy analysis, methodological and resource use studies are within the Topic scope. Health policy considerations should be primarily focused on financing mechanisms and affordability of health care although other surrounding issues such as health insurance, reimbursement and cost-containment strategies will be considered.

Industrial Motion Control Dr. Hakan Gurocak,2016-03-14 Motion control is widely used in all types of industries including packaging, assembly, textile, paper, printing, food processing, wood products, machinery, electronics and semiconductor manufacturing. Industrial motion control applications use specialized equipment and require system design and integration. To design such systems, engineers need to be familiar with industrial motion control products; be able to bring together control theory, kinematics, dynamics, electronics, simulation, programming and machine design; apply interdisciplinary knowledge; and deal with practical application issues. The book is intended to be an introduction to the topic for senior level undergraduate mechanical and electrical engineering students. It should also be resource for system design engineers, mechanical engineers, electrical engineers, project managers, industrial engineers, manufacturing engineers, product managers, field engineers, and programmers in industry.

**Global Economic Prospects, Volume 7, June 2013** The World Bank,2013-06-12 The global economy appears to be transitioning toward a more stable period. Although acute risks have diminished, real-side activity remains sluggish - especially in high-income Europe. Most developing countries have fully recovered from the crisis. Although growth is slower than during the boom period, it is in line with underlying potential, and output is projected to pick up only gradually to around 5.8 percent by 2015. High unemployment and spare capacity remain pressing problems in developing Europe and the Middle East and North Africa. With a more stable external environment, new risks and challenges are gaining prominence, including the potential impact on exporting countries of a faster than anticipated decline in commodity prices, the possibility that the eventual withdrawal of quantitative easing exposes vulnerabilities in developing countries, and the need to resort increasingly to supply-side rather than demand stimulus policies to achieve stronger growth.

World Bank East Asia and Pacific Economic Update April 2016 World Bank,2016-04-11 In the past 6 months, developing East Asia and Pacific has faced a challenging external environment, but growth has generally remained resilient. Over the next 3 years, growth is expected to ease modestly. China will continue its gradual shift to a more sustainable growth path. Some economies will be affected by low commodity prices and weaker external demand. This outlook is subject to elevated risks. Countries should prioritize monetary and fiscal policies that reduce their exposure to risks and strengthen market confidence. In China, there is a need to reduce leverage. In several countries, action is required to enhance transparency, strengthen accountability, and redefine the role of the state. Efforts to reduce barriers to trade should be redoubled, with a particular focus on non-tariff measures and regulatory barriers, including to trade in services. The region must increase its readiness to benefit from the digital revolution, and in particular develop the essential “analog complements” to digital technologies.

**One Child** Sarah Conly,2015-11-04 A compelling argument for the morality of limitations on procreation in lessening the harmful environmental effects of unchecked population We live in a world where a burgeoning global population has started to have a major and destructive environmental impact. The results, including climate change and the struggle for limited resources, appear to be inevitable aspects of a difficult future. Mandatory population control might be a possible last resort

to combat this problem, but is also a potentially immoral and undesirable violation of human rights. Since so many view procreation as an essential component of the right to personal happiness and autonomy, the dominant view remains that the government does not have the right to impose these restrictions on its own citizens, for the sake of future people who have yet to exist. Sarah Conly is first to make the contentious argument that not only is it wrong to have more than one child in the face of such concerns, we do not even retain the right to do so. In *One Child*, Conly argues that autonomy and personal rights are not unlimited, especially if one's body may cause harm to anyone, and that the government has a moral obligation to protect both current and future citizens. Conly gives readers a thought-provoking and accessible exposure to the problem of population growth and develops a credible view of what our moral obligations really are, to generations present and future.

**The Pacific Islands** Moshe Rapaport, 2013-05-31 The Pacific is the last major world region to be discovered by humans. Although small in total land area, its numerous islands and archipelagoes with their startlingly diverse habitats and biotas, extend across a third of the globe. This revised edition of a popular text explores the diverse landforms, climates, and ecosystems of the Pacific island region. Multiple chapters, written by leading specialists, cover the environment, history, culture, population, and economy. The work includes new or completely revised chapters on gender, music, logging, development, education, urbanization, health, ocean resources, and tourism. Throughout two key issues are addressed: the exceptional environmental challenges and the demographic/economic/political challenges facing the region. Although modern technology and media and waves of continental tourists are fast eroding island cultures, the continuing resilience of Pacific island populations is apparent. This is the only contemporary text on the Pacific Islands that covers both environment and sociocultural issues and will thus be indispensable for any serious student of the region. Unlike other reviews, it treats the entirety of Oceania (with the exception of Australia) and is well illustrated with numerous photos and maps, including a regional atlas. **East Asia and Pacific Cities** Judy L. Baker,Gauri U. Gadgil,2017-07-27 Urbanization in East Asia and the Pacific has created enormous opportunity for many. Yet the rapid growth of cities can also create challenges as national and local governments try to keep up with the needs of their growing populations. Among these challenges is a lack of affordable housing, resulting in increasing slums, deficits in basic service provision, and widening inequality for urban dwellers. This study aims to better understand urban poverty and inequality in East Asian cities, recognizing that many countries of the region, particularly those of middle-income status, are at a critical juncture in their urbanization and growth process where potential social divisions in cities could harm prospects for future poverty reduction. The study uses a multidimensional approach to understand urban poverty and inclusion and draws on examples of programs and policies that have been successfully implemented in the East Asia region to develop a set of guiding principles for policy makers.

**Standards for Internal Control in the Federal Government** United States Government Accountability Office,2019-03-24 Policymakers and program managers are continually seeking ways to improve accountability in achieving an entity's mission. A key factor in improving accountability in achieving an entity's mission is to implement an effective internal control system. An effective internal control system helps an entity adapt to shifting environments, evolving demands, changing risks, and new priorities. As programs change and entities strive to improve operational processes and implement new technology, management continually evaluates its internal control system so that it is effective and updated when necessary. Section 3512 (c) and (d) of Title 31 of the United States Code (commonly known as the Federal Managers' Financial Integrity Act (FMFIA)) requires the Comptroller General to issue standards for internal control in the federal government.

Macroeconomic Developments and Selected Issues in Small Developing States International Monetary Fund,2015-09-03 This report builds on the work in the 2013 Board paper on Fund Engagement with Small States, the 2013 background papers on Asian and Pacific small states and Caribbean small states, and the 2014 staff guidance note. It provides a deeper analysis and policy recommendations in respect of three challenges identified in these papers. Looking ahead, the paper also analyses the impact and possible policy responses to two global economic trends—lower oil prices and diverse movements in major currencies.

The Carbon Fix Stephanie Paladino,Shirley J Fiske,2016-11-18 Given the growing urgency to develop global responses to

a changing climate, *The Carbon Fix* examines the social and equity dimensions of putting the world's forests—and, necessarily, the rural people who manage and depend on them—at the center of climate policy efforts such as REDD+, intended to slow global warming. The book assesses the implications of international policy approaches that focus on forests as carbon and especially, forest carbon offsets, for rights, justice, and climate governance. Contributions from leading anthropologists and geographers analyze a growing trend towards market principles and financialization of nature in environmental governance, placing it into conceptual, critical, and historical context. The book then challenges perceptions of forest carbon initiatives through in-depth, field-based case studies assessing projects, policies, and procedures at various scales, from informed consent to international carbon auditing. While providing a mixed assessment of the potential for forest carbon initiatives to balance carbon with social goals, the authors present compelling evidence for the complexities of the carbon offset enterprise, fraught with competing interests and interpretations at multiple scales, and having unanticipated and often deleterious effects on the resources and rights of the world's poorest peoples—especially indigenous and rural peoples. *The Carbon Fix* provides nuanced insights into political, economic, and ethical issues associated with climate change policy. Its case approach and fresh perspective are critical to environmental professionals, development planners, and project managers; and to students in upper level undergraduate and graduate courses in environmental anthropology and geography, environmental and policy studies, international development, and indigenous studies.
