Microsoft PhotoDraw 2000 at a Glance Stephen W. Sagman,1999 Microsoft PhotoDraw 2000 is a very nifty business graphics program for folks who don't typically create graphics for a living. If you don't have time to worry about bezier curves, or the differences between vector and bitmap graphics, PhotoDraw is for you -- and so is Microsoft Photodraw 2000 At A Glance.

Twentieth Century Land Settlement Schemes Roy Jones,Alexandre M.A. Diniz,2018-10-17 Land settlement schemes, sponsored by national governments and businesses, such as the Ford Corporation and the Hudson's Bay Company, took place

in locations as diverse as the Canadian Prairies, the Dutch polders, and the Amazonian rainforests. This novel contribution evaluates a diverse range of these initiatives. By 1900, any land that remained available for agricultural settlement was often far from the settlers' homes and located in challenging physical environments. Over the course of the twentieth century, governments, corporations and frequently desperate individuals sought out new places to settle across the globe from Alberta to Papua New Guinea. This book offers vivid reports of the difficulties faced by many of these settlers, including the experiences of East European Jewish refugees, New Zealand soldier settlers and urban families from Yorkshire. This book considers how and why these settlement schemes succeeded, found other pathways to sustainability or succumbed to failure and even oblivion. In doing so, the book indicates pathways for the achievement of more economically, socially and environmentally sustainable forms of human settlement in marginal areas. This engaging collection will be of interest to individuals in the fields of historical geography, environmental history and development studies.

The Impact of Climate Change Mitigation on Indigenous and Forest Communities Maureen F. Tehan, Lee C. Godden, Margaret A. Young, Kirsty A. Gover, 2017-10-26 The international legal framework for valuing the carbon stored in forests, known as 'Reducing Emissions from Deforestation and Forest Degradation' (REDD+), will have a major impact on indigenous peoples and forest communities. The REDD+ regime contains many assumptions about the identity, tenure and rights of indigenous and local communities who inhabit, use or claim rights to forested lands. The authors bring together expert analysis of public international law, climate change treaties, property law, human rights and indigenous customary land tenure to provide a systemic account of the laws governing forest carbon sequestration and their interaction. Their work covers recent developments in climate change law, including the Agreement from the Conference of the Parties in Paris that came into force in 2016. *The Impact of Climate Change Mitigation on Indigenous and Forest Communities* is a rich and much-needed new contribution to contemporary understanding of this topic.

Nothing Daunted Dorothy Wickenden, 2011-06-21 From the author of *The Agitators*, the acclaimed and captivating true story of two restless society girls who left their affluent lives to "rough it" as teachers in the wilds of Colorado in 1916. In the summer of 1916, Dorothy Woodruff and Rosamond Underwood, bored by society luncheons, charity work, and the effete men who courted them, left their families in Auburn, New York, to teach school in the wilds of northwestern Colorado. They lived with a family of homesteaders in the Elkhead Mountains and rode to school on horseback, often in blinding blizzards. Their

students walked or skied, in tattered clothes and shoes tied together with string. The young cattle rancher who had lured them west, Ferry Carpenter, had promised them the adventure of a lifetime. He hadn't let on that they would be considered dazzling prospective brides for the locals. Nearly a hundred years later, Dorothy Wickenden, the granddaughter of Dorothy Woodruff, found the teachers' buoyant letters home, which captured the voices of the pioneer women, the children, and other unforgettable people the women got to know. In reconstructing their journey, Wickenden has created an exhilarating saga about two intrepid women and the "settling up" of the West.

Grid Resource Management Mumtaz Siddiqui, Thomas Fahringer, 2010-01-30 In a dynamic computing environment, such as the Grid, resource management plays a crucial role for making distributed resources available on-demand to anyone from anywhere at any time without undermining the resource autonomy; this becomes an art when dealing with heterogeneous resources distributed under multiple trust domains spanning across the Internet. Today Grid execution environments provide abstract workflow descriptions that need a dynamic mapping to actual deployments; this further accentuates the importance of resource management in the Grid. This monograph renders boundaries of the Grid resource management, identifies research challenges and proposes new solutions with innovative techniques for on-demand provisioning, automatic deployments, dynamic synthesis, negotiation-based advance reservation and capacity planning of Grid resources. The Grid capacity planning is performed with multi-constrained optimized resource allocations by modelling resource allocation as an on-line strip packing problem and introducing a new solution that optimizes resource utilization and QoS while generating contention-free solutions. On-demand resource provisioning becomes possible by simplifying abstract resource descriptions independent from the concrete installations. The book further explains the use of the semantic web technologies in the Grid to specify explicit definitions and unambiguous machine interpretable resource descriptions for intelligent resource matching and synthesis; the synthesis process generates new compound resources with aggregated capabilities and prowess. The newly introduced techniques have been developed and integrated in ASKALON Grid application development and runtime environment, deployed in the Austrian Grid, and demonstrated through well performed experiments.

Dark Sky C. J. Box, 2021-03-02 Wyoming game warden Joe Pickett must accompany a Silicon Valley CEO on a hunting trip--but soon learns that he himself may be the hunted--in the thrilling new novel from #1 New York Times bestselling author C. J. Box. **Winner of the Western Writers of America Spur Award for contemporary novel** When the governor of Wyoming gives Joe Pickett the thankless task of taking a tech baron on an elk hunting trip, Joe reluctantly treks into the wilderness with his high-profile charge. But as they venture into the woods, a man-hunter is hot on their heels, driven by a desire for revenge. Finding himself without a weapon, a horse, or a way to communicate, Joe must rely on his wits and his knowledge of the outdoors to protect himself and his companion. Meanwhile, Joe's closest friend, Nate Romanowski, and his

own daughter Sheridan learn of the threat to Joe's life and follow him into the woods. In a stunning final showdown, the three of them come up against the worst that nature--and man--have to offer.

Ethics for International Business John Kline, 2010-07-27 Business takes place in an increasingly global environment, crossing political and cultural boundaries that challenge corporate values. The central focus of this successful and innovative text lies in how to make and explain 'best choice' judgments when confronting ethical dilemmas in international business situations. The newly-updated version of this groundbreaking textbook continues to provide a topical and relevant analysis of the ethical dimensions of conducting business in a global political economy. From a starting point of applied ethics, the book introduces a common set of normative terms and analytical tools for examining and discussing real case scenarios. Extensive real-world examples, presented in the form of exhibits, cover issues including: foreign production, including sweatshops export of hazardous products testing and pricing of HIV-AIDS drugs advertising tobacco, alcoholic beverages and infant formula deceptive marketing techniques and bribery religious and social discrimination cultural impacts from 'music, movies and malls' environmental issues, including oil spills, rain forest preservation, global warming and genetically modified foods fair trade certification and consumer boycotts oil investments in the Sudan, Burma and Nigeria. To keep pace with the changing landscape of global business, this new edition features: updated exhibits that introduce new issues, including internet censorship and privacy, marketing and obesity, dumping electronic waste in Ghana, the costs of bottled water, and Wal-Mart's supplier code in China increased coverage of issues arising in emerging markets updated descriptions and assessments of relevant international agreements seventeen new photographs that were chosen to accompany cases designed for classroom discussion framing questions to guide discussion of issues in topical chapters three additional figures that help depict the ethical analysis process. The continued globalization of business increases the relevance of this textbook and its unique focus on specifically international ethical challenges faced by business, where governments and civil society groups play an active role. While most business ethics texts continue to focus heavily on ethical theory, this textbook condenses ethical theory into applied decision-making concepts, emphasizing practical applications to real world dilemmas. Anyone with an interest in the ethical implications of international business, or the business implications of corporate responsibility in the global market, will find this book a thought-provoking yet balanced analysis. Clearly written, this has become the textbook of choice in this increasingly important field.
