Papua New Guinea: Critical Development Constraints Asian Development Bank,2012-04-01 Papua New Guinea's economic growth has outpaced the majority of economies in Southeast Asia and the Pacific since 2007. Its development challenges, however, remain daunting, and it lags behind other countries in the region in terms of per capita income and achievement of the Millennium Development Goals. This raises the question of how the country can make its economic growth high, sustained, inclusive, and broad-based to more effectively improve its population's welfare. This report identifies the critical constraints to these objectives and discusses policy options to help overcome such constraints.

Television in the Pacific Islands Rico Lie,1990

Finding Balance Asian Development Bank,2012-09-01 State-owned enterprises (SOEs) play a significant role in the economy of Papua New Guinea (PNG), as they do in other Pacific countries. They provide a range of essential services, most notably power, water, telecommunications, and transport that are vital to commerce and to the livelihoods of all communities. The performance of the SOEs therefore has an important impact on PNG's ability to achieve inclusive economic growth. This study benchmarks the performance of PNG's SOEs with those of Fiji, the Marshall Islands, Samoa, Solomon Islands, and Tonga; assesses the key drivers of this performance; and identifies successful reform strategies that can guide future policy action. Particular attention is given to the legal, regulatory, governance, and monitoring frameworks of each country, given their known impact on the performance of the SOEs.

Papua New Guinea International Monetary Fund. Asia and Pacific Dept,2023-03-29 Papua New Guinea (PNG) is a fragile state, vulnerable to natural disasters and terms of trade shocks. Low commodity prices in 2014-20, a severe drought in 2015-16, and a major earthquake in 2018 softened growth, led to shortages of FX, and contributed to a pre-pandemic build-up of public debt. The pandemic further increased public debt, which is now at high risk of distress, while development needs remain considerable.

Optimal Guidance and Its Applications in Missiles and UAVs Shaoming He,Chang-Hun Lee,Hyo-Sang Shin,Antonios Tsourdos,2020-05-13 This book presents a comprehensive overview of the recent advances in the domain of optimal

guidance, exploring the characteristics of various optimal guidance algorithms and their pros and cons. Optimal guidance is based on the concept of trajectory optimization, which minimizes the meaningful performance index while satisfying certain terminal constraints, and by properly designing the cost function the guidance command can serve as a desired pattern for a variety of mission objectives. The book allows readers to gain a deeper understanding of how optimal guidance law can be utilized to achieve different mission objectives for missiles and UAVs, and also explores the physical meaning and working principle of different new optimal guidance laws. In practice, this information is important in ensuring confidence in the performance and reliability of the guidance law when implementing it in a real-world system, especially in aerospace engineering where reliability is the first priority.

Papua New Guinea: Request for a Staff-Monitored Program; and Staff Report International Monetary, International Monetary Fund. Asia and Pacific Dept, 2022-02-22 Papua New Guinea (PNG) is a fragile state, vulnerable to recurrent shocks. A third wave of the COVID-19 pandemic is straining the healthcare system. Widespread vaccine hesitancy has contributed to very low uptake of the vaccines with about only 2 percent of the population fully vaccinated. Real GDP is estimated to rebound modestly to grow by 1.7 percent in 2021 after the downturn in 2020. Elections are due to take place in June 2022, and the formal campaign period will commence by end-April.

A Beautiful Constraint Adam Morgan, Mark Barden, 2015-01-07 An inspiring yet practical guide for transforming limitations into opportunities A Beautiful Constraint: How to Transform Your Limitations Into Advantages And Why It's Everyone's Business Now is a book about everyday, practical inventiveness, designed for the constrained times in which we live. It describes how to take the kinds of issues that all of us face today—lack of time, money, resources, attention, know-how—and see in them the opportunity for transformation of oneself and one's organization's fortunes. The ideas in the book are based on the authors' extensive work as business consultants, and are brought to life in 35 personal interviews from such varied sources as Nike, IKEA, Unilever, the U.S. Navy, Formula One racecar engineers, public school teachers in California, and barley farmers in South Africa. Underpinned by scientific research into the psychology of breakthrough, the book is a practical handbook full of tools and tips for how to make more from less. Beautifully designed and accessible, A Beautiful

Constraint will appeal beyond its core business audience to anyone who needs to find the opportunity in constraint. The book takes the reader on a journey through the mindset, method and motivation required to move from the initial victim stage into the transformation stage. It challenges us to: Examine how we've become path dependent—stuck with routines that blind us from seeing opportunity along new paths Ask Propelling Questions to help us break free of those paths and put the most pressing and valuable constraints at the heart of our process Adopt a Can If mentality to answer these questions—focused on how, not if Access the abundance to be found all around us to help transform constraints Activate the high-octane mix of emotions necessary to fuel the tenacity required for success We live in a world of seemingly ever-increasing constraints, driven as much by an overabundance of choices and connections as by a scarcity of time and resources. How we respond to these constraints is one of the most important issues of our time and will be a large determinant of our progress as people, businesses and planet, in the future. A Beautiful Constraint calls for a more widespread capability for constraint-driven problem solving and provides the framework to achieve that.

Constraint Solving and Planning with Picat Neng-Fa Zhou,Håkan Kjellerstrand,Jonathan Fruhman,2015-11-07 This book introduces a new logic-based multi-paradigm programming language that integrates logic programming, functional programming, dynamic programming with tabling, and scripting, for use in solving combinatorial search problems, including CP, SAT, and MIP (mixed integer programming) based solver modules, and a module for planning that is implemented using tabling. The book is useful for undergraduate and graduate students, researchers, and practitioners.

Improving agricultural productivity in Papua New Guinea: Strategic and policy considerations Benny, Dickson, Benson, Todd, Ivekolia, Mark, Kedir, Jamal, Mekamu, Ovah, Raywin, 2022-02-10 If smallholder farming households in Papua New Guinea achieve higher crop productivity levels, progress will be made along several dimensions of the development vision for PNG - increasing GDP for the agricultural sector and the overall economy; driving growth, diversification, and transformation of local rural economies; improving food consumption; and reducing poverty. In this paper, we examine recent data on yields for the most important crops grown in PNG, assess what yields might be achieved based on productivity data from areas of Indonesia with similar growing conditions, and sketch where policy reforms could provide incentives and access to technologies to achieve higher crop yields by all farmers across PNG.
